By Water

Follow the government buoys coming into the Wareham River leaving Dry Ledge to the East and Great Hill to the West. After Great Hill begin following the buoys by Red Nun #4, Green Can #9 and don't miss Red Nuns #10 and #12. Long Beach has touched a lot of boat bottoms because folks are eager to sail into the river and go right. At high tide you don't see the beach much, if at all. From there simply follow the buoys along the River until you reach our docks on the right before the Narrows Bridge. Our red roofs are visible on the right from pretty far away. Before docking make a couple turns so that you are aware of what the tide is doing and can plan your landing accordingly. Please note Cape Cod Shipbuilding Co. locks the entrance gates from 4:30PM – 7:30AM.
